Reclaim your body with  
Vaginal Laser Rejuvenation

## Experts and patients opinions:

"So little effort for such a positive patient response. My menopause patients are so thankful for helping to restore their sex lives and relieve their vaginal dryness. One patient said she felt 19 again!"

*Dr. Scott Evan Eder, Gynecologist,  
New Jersey, US*

"Would not have expected such a comfortable procedure."

*FemTouch Patient A*

"After one procedure I already feel younger and even the sex is better."

*FemTouch Patient B*

"After 8 weeks and 2 treatments I could go back to running without leaking, and this is very important for a 45 year old woman!"

*FemTouch Patient C*

*Laugh*

without fear  
of embarrassment

*Love*

without discomfort

# Why FemTouch™?

## Fast

Safe, effective and comfortable out-patient procedure taking just a few minutes

## Efficient

Optimal outcomes just after 2-4 sessions

## Simple

No anesthesia or special post procedure care is required

# What should I expect?

## When will I see results?

Typically 2-4 treatments are needed to see optimal results and achieve the desired outcome on the vaginal layer. In clinical evaluations women reported feeling improvement already after 1-2 treatment sessions.

## What can I expect after treatment?

Immediately after treatment you may feel a very mild heat sensation in which case your treatment provider can prescribe a hydrating gel. This sensation should not last longer than a few hours.

# What is it?

FemTouch™ is an out-patient, minimally invasive, non-surgical, non-hormonal procedure for treating and improving vaginal health, that enables your physician to offer you remarkable results just within a several brief sessions lasting a few minutes each.

Postmenopausal women:

Urinary Incontinence

Vaginal Atrophy

Vaginal atrophy or vaginal dryness, is a common symptom in postmenopausal women that is sometimes accompanied by constant itching or pain, as well as pain during sexual intercourse. Stress urinary incontinence is another symptom appearing also in a younger demographic, as well as vaginal laxity after child birth which can impact satisfaction with sexual intercourse.

# How does it work?

## FemTouch™ technology

The FemTouch™ state of the art CO<sub>2</sub> laser technology addresses vaginal health related conditions by promoting the remodeling and rejuvenation of vaginal mucous layer. The Fractional CO<sub>2</sub> laser beams are applied along the vaginal wall, resulting in the regeneration of the tissue.

## The treatment

Before treatment, your physician should assess your vaginal health to ensure you are a good candidate for the treatment. During the treatment, your physician will move the sterilized applicator along the vaginal wall in an outward motion, applying the laser in a 360° pattern covering the entire area. The whole procedure should take just a few minutes. You may experience a minor heat sensation during the treatment but it is very gentle and you should not feel uncomfortable.

Fractional laser beams are applied along the vaginal wall and promote the remodeling of the vaginal layer.
